

Winter Doesn't Feel Like Winter at Raptor Reef Indoor Waterpark!

Banyan Trees are literally growing in Raptor Reef Indoor Waterpark. One 27 foot and three 18 1/2 feet trees are now situated in various locations of the waterpark. These amazing trees were created by Tree Scapes out of San Diego California. Tree Scapes has created and installed trees at various locations including; Rain Forest Restaurants, Disneyland, Universal Studios and the San Diego Zoo to name a few.

Along with these amazing trees you can enjoy the fresh air smell and imagine you are actually in a jungle, not an indoor waterpark, as we also recently installed new filters for our waterpark air filtration system to deal with the chlorine smells found predominately in Indoor Waterparks.

So plan a visit to Raptor Reef Indoor Waterpark and come in and lean back and relax, enjoy the new trees, fresh air and all the fun water activities while you imagine you really are somewhere tropical.
